Roxanne and Steve,

Attached is the SOW for the in-kind services support. Also attached are the resumes for Ron Chinn, President of Innovex, and Kate Waldo, who will lead the work being done in Hawaii. We met with both of them last week to discuss the SOW.

Bob

Good afternoon Mr. Chinn,

Please see the attached files for the SOW and related attachments for support services to DoH UST/LUST program. Please respond with a priced quote by August 25, 2016, 1800 PST or earlier, if possible. Let me know if you have any questions or concerns or if you wish to set up a scoping call prior to the due date to discuss the SOW.

Best regards,

James Hallman

Hi Steve -

As requested, here are the resumes of some of my key staff that might be able to support your program in Hawaii.

Ron Chinn, PE, PMP, CHMM. President & CEO, California. (plus more letters that I'm embarrassed to talk about). California. Well you know me. Lots petroleum/UST experience (big oil, independents), remediation engineering, policy experience, regulatory negotiation, life-cycle cost management, bulk fuel facility experience (terminals and refineries). Messed around with the Trans Alaska pipeline and Valdez Marine terminal. Plus I own a large selection of quality Aloha shirts.

Kate Waldo, PE, PMP, CHMM. Principal Engineer, California. Not sure if you remember Kate from the CA policy days, but she assisted me with a lot of the back end stuff. Kate has an enormous amount of petroleum experience in site investigation, remediation, management, and regulatory negotiation. She also helped run my California Closure program for BP/ARCO where we identified low threat cases and just beat regulators with policy until they closed 'em. This was before the days of the low threat closure policy, so it was kind of like hunting with sticks. Fun as hell. As a certified Project Management Professional (PMP), she's all over defining and managing scope, schedule, budget, quality, communications, risk, and stakeholder involvement. On paper, she's almost as qualified as I am, but she's way nicer. And more organized.

Peter Battuello, LG, LHG. Principal Hydrogeologist, Washington State. Peter has had a long and successful career running large contracts (\$20M-\$100M) with the Federal Government, including an EPA RAC out of Seattle. He's got the most Federal experience of us INNOVEX folks by far. He's very good with project planning and management. He's also a former Navy guy (way back in the day) and was stationed at Pearl Harbor for a stint. He's good with public speaking and presents very well. Also, as a licensed hydrogeologist, he's very qualified to deal with groundwater issues including understanding fate and transport, etc...

SUPPORT:

Dawn Wulf, LG, LHG. Principal Hydrogeologist, Washington State. As a Principal Hydrogeologist, Dawn has a lot of experience managing large projects involving various contaminant releases to groundwater. She's extremely detail oriented and technically extremely strong. She has a lot of Federal Experience, though most of it is in the Pacific Northwest.

Glenn Hayman, LG, LHG, PG. Principal Hydrogeologist, Washington State. Glenn is similar to Dawn: highly technical with lots of experience. He's strong in hydrogeologic modeling, fate and transport, and dealing with J&E Models. His experience is mostly in the Pacific Northwest, but he's done a fair amount of Federal work.

Brian Busch. Supervising Scientist, California. Brian brings forward enormous petroleum experience working with BP/ARCO, Chevron, etc. He's primarily a remediation guy and has a lot of experience with virtually all conventional remediation strategies – SVE, DPE, AS, GWE, oxidant injections, etc. He knows more about hands-on remediation than I do, and I'm no slouch.

In addition to the folks presented above, we have a good number of junior staff that can support our efforts. While we don't have a Dawn Zemo, we can certainly pick up technical experts as needed to enhance the program overall.

Also, as requested, attached is a writing sample: an RI Work Plan that we prepared for BP/ARCO. Of course if you need us to talk like we from Hawaii, can.

Please let me know if you have any questions, or if there's anything else you need!

Thanks,
—Ron
